

Julie Auger joined the Salk Institute as Executive Director Research Operations in 2021. She oversees all shared scientific resources at the Institute. Previously she served in similar leadership roles at UC Davis, UC San Francisco and the University of Chicago. She has a scientific and technical background in immunology and cell biology, and has directed flow cytometry, antibody production and immunohistochemistry core facilities. With business school training from the University of Chicago, she has developed a strong set of skills to administratively manage shared resources. She brings a love of science, an unending quest for data to define reality and a passion for organizing chaos to her roles.
