

Ben Abrams Directs the Life Sciences Microscopy Center at UC Santa Cruz where he has been working since 2011. He earned his Ph.D. his in Molecular, Cell and Developmental Biology from UCSC in 2007. He is the sole full-time employee of the Light Microscopy Center, which serves about 80 labs and sees over 5500 hours of annual billed use across 10 instruments. He enjoys support from his faculty committee advisor and more broadly from his home MCD Biology Department and the Physical and Biological Sciences Division. Ben really enjoys the teaching and mentoring aspects of his job and is always looking for the most effective ways to train new users and meet the needs of his diverse user group. Ben has been involved in the ABRF since 2013 and has found it to be an invaluable source of information about best practices in core facility management.
